

Innovative technology for quicker payback time on self service washes

The innovative frequency modulator technology leads to a more simple machine with lower wear parts and downtime due to maintenance. The machine will thus be in operation for longer periods and will also cost less in service. This in turn decreases investment payback time. Simultaneously, the AUTO BOOSTER 5 M is more comfortable and easier to use, with lower noise levels - creating greater user satisfaction and loyalty to the cleaning site, leading to more repeat business. Low fuel, water and electricity consumption also reduce daily operating costs.

- Low wear and tear and service requirements reduce maintenance costs
- Innovative frequency modulated technology
- Low daily run costs through reduced fuel, water and electrical consumption
- Available with steel and stainless steel coils in diesel fired models for areas with hard or soft water
- Available with electrical heating system for pollution free cleaning
- Ergonomical and pressure relieved accessories for extra comfort in use
- Low noise levels
